Dianna,

This is actually an emergency response due to the Gold King Mine blow out. Because the extent of contamination could possibly cover a long stretch of river, they may decide on a different name other than Gold King. At the moment they seem to be referring to it as Gold King Mine Emergency Response. If they use Upper Cement Creek locational information, then I think it will be appropriate.

I just got a call from Kelcey Land and Joe Poetter regarding creating another site to track this incident. Right now we have Upper Cement Creek, Red and Bonita Mine, and Upper Animas Mining District. This 4th one will be added since they are requesting separate SSID to track the costs. Not sure what the site name is going to be, but Joyce Ackerman is the OSC and I believe they're going to use the Upper Cement Creek locational information.

Thanks

Dianna

Thanks for sharing. It's great to see what it looks like. We actually discussed this site yesterday regarding the funding needs.
